Continuation of Substance of Interview including description of the general nature of what was discussed: In July 2003, the Examiner was informed by applicant's representative that the sequence compliance letter mailed 6/17/2003 was in error because substitute specification pages providing SEQ ID NOs were filed with the amendment of 8/28/2001. These papers were found in the back of the application file and were indicated as not entered in the amendment. The examiner had the art unit LIE enter the specification pages. However, page 1 of the 8/28/2001 amendment still indicates that these amendments were not entered. This is in error; the amendments were in fact entered in July 2003. Since July 2003, the Office converted to image file wrappers. During the scanning process, the specification pages filed 8/28/2001 were not scanned into the application. The examiner, on 4/15/2004 requested copies of these pages from Patrick Sage which were immediately faxed to the examiner. These pages have been submitted for scanning. An office action in the present application is forthcoming. The examiner appreciates Applicant's patience and Applicant's representative's assistance in resolving this matter..
